1 Day Classes Saturday

First Aid/CPR

Instructor: *Tony Campbell*

This class is designed to teach basic First Aid/CPR.

Building Construction

Instructor: *Kevin Otte*

This class is designed to provide a basic understanding of how the construction type, alternative design and materials influence a building's reaction to fire. This class will provide recognition of relevant information about buildings before fire, as well as fire ground "reading" of the building that will provide the ability to assess building stability, resistance to fire, and determine likely paths of fire extension.

1 Day Classes Sunday

Haz Mat Refresher

Instructor: *Tony Campbell*

This class is an 8 hour refresher covering all aspects of a hazmat incident.

NOTE: Application made for LET Annual In-Service Credit.

LPG Emergencies

Instructor: *Ross Neff*

This class will provide a basic understanding of the properties of propane and its uses; with attention to Fire and Life Safety during a response to an LPG emergency.

Fire Behavior

Instructor: *Kevin Otte*

Students will learn to predict probable fire behaviors and know the actions necessary to change or prevent these fire behaviors.

2 Day Classes

1. EVOG

Instructor: *Jason Lively*

This is a combination classroom and practical skills training course on emergency vehicle operations. Safety, legal aspects, inspection and driver responsibilities are covered. Both written and practical examinations are administered. Meets WV State Fire Commission and State EMS Initial driving training requirements and recommendations. The course is designed to meet DOT and NFPA standards. Students are encouraged to bring their own apparatus for the driving part of the course. PREREQUISITES: Must have proof of valid Operators License and be 18 yrs of age.

2. HazMat Operations/Awareness NFPA (472) 2004

Instructor: *Skip Kosar*

This course provides students with an understanding of the ways to confine, contain, or divert a hazardous materials release using defensive methods, such as damming, diking, and diverting. The student will have the opportunity for hands-on experience in building different types of containment systems and setting up decontamination areas. Class Limit: 20 FULL TURNOUT GEAR & SCBA REQUIRED. NOTE: Application made for LET Annual In-Service Credit.

3. Search Management

Instructor: *Louis Robinson*

This class is designed to teach firefighters and emergency responders the basic skills necessary to perform search and rescue operations. NOTE: Dress appropriately for the weather on Sunday.

4. **ISO-Incident Safety Officer**

Instructor: *Steve Johnston*

This 2-day course examines the Safety Officer's role at emergency responses. A specific focus on operations within an Incident Command System as a Safety Officer is a main theme. All types of hazardous response situations will be emphasized.

5. **Truck Company Operations**

Instructor: *Rodney Strait*

This course provides instruction in the duties and responsibilities of an engine company. Topics include positioning of apparatus, use of attack and back-up lines, search and rescue and water supply.

6. **Rope Rescue Awareness/Operations**

Instructor: *Larry Helms*

This course is intended to address specific rope rescue techniques as outlined in the operations level of NFPA 1670. Topics include: rope rescue knots, lowering and raising systems. NOTE: Helmets, eye protection and gloves required.

7. **Basic Structure Firefighting**

Instructor: *Larry Couch*

This hands on course is designed to introduce the new firefighter to the basic fundamentals of fire ground operations or bring the experienced firefighter "back to the basics". Topics to be covered will include fire suppression; hose line advancement, forcible entry, ground ladder use, victim rescue, SCBA confidence course, immediate reaction drills and ventilation. This class will be held in a controlled environment using simulated smoke. FULL TURNOUT GEAR AND SCBA WITH SPARE BOTTLE REQUIRED.

8. **Project Lifesaver**

Instructors: *Sue Riggs and Dave Byers*

A Public Safety Program designed to protect and locate missing persons due to wandering. NOTE: Application made for LET Annual In-Service Credit.

9. **Auto Extrication Awareness/Operations**

Instructor: *Lonny Riggs*

This class will meet the awareness and operations level criteria for vehicle rescue. Scene assessment, victim and rescuer safety, accident scene control and management will be covered. Students will be updated on the newest vehicle technology to include hybrid vehicles. This class will start in the classroom and move to a hands-on operations concentrating on disentanglement by the use of advanced tools and techniques along with scenario activities. FULL TURNOUT GEAR REQUIRED.

10. **NIMS 400**

Instructor: *John Ashcraft*

This 2 day course will provide training for the advanced application of the Incident Command System. This course is designed for mid and upper level managers who are expected to perform in a management capacity in an area command or multi-agency coordination entity. Target students for this course include personnel performing as strike team leaders, task force leaders, unit leaders, division/group supervisors, branch directors, Chief Level Officers and is recommended for all Emergency Operations Center Staff. In addition this class meets the minimum standards required by the Federal Government for Chief Officers for Fire Departments to remain eligible for Federal Grant assistance. NOTE: Application made for LET Annual In-Service Credit.

Class Requirements

PREREQUISUTES: Some classes require the student to have knowledge in specific areas to be eligible to participate in certain classes.

Most classes are “hands on” and therefore will be conducted OUTSIDE in the weather so please read your course description and dress appropriately. Other courses require special equipment. The required equipment is listed with the class description. If the student is required to have:

FULL PROTECTIVE GEAR, students must have NFPA approved safety glasses, leather or Kevlar gloves, steel toe shoes or boots, and a helmet.

NO EXCEPTIONS.

FULL TURN GEAR, they must have NFPA approved safety glasses, helmet, nomex hood, gloves, boots, bunker coat, and bunker pants.

NO EXCPECTIONS.

SCBA AND SPARE BOTTLE, you are responsible for supplying your own Self-Contained Breathing Apparatus, face piece, and spare air cylinder. SCBA cylinders will not be filled if hydrostatic test date is expired.
